

CS713 RFID Access Control Antenna with LED/Buzzer/Gate Control

Product Profile:

CS713 is a UHF RFID access control antenna with LEDs, buzzer and gate control that is perfect for access control of personnel, vehicle or logistics pallet. When coupled with the embedded intelligent agent in CS461 fixed reader that contains tag group filtering, this antenna can enable rapid access control deployment. The LEDs and the buzzer provide effective visual and audio cue for personnel, vehicle or pallet handler to pass or not pass the gate. The gate control output can be conveniently connected to a relay for further operation of a barrister arm or turnstile.
